SUPPLEMENTAL RESPONSE

ENTER 1600/2900

Honorable Commissioner for Patents
Washington, D.C. 20231

Sir:

Supplemental to the amendment filed March 10, 2003, with the RCE, on which applicants continue to primarily rely, attached hereto for the examiner's consideration is a second declaration executed by the inventor Hidetomo KITAMURA, that is mentioned in the amendment filed March 10, 2003, and that clearly shows the difference between the RCJ 3.1 fetal cells of Grigoriadis, which requires the presence of dexamethasone for differentiation to adipocytes and chondrocytes, and the cell line derived from a normal adult animal (as claimed in the present invention), which does not require the presence of dexamethasone to differentiate into adipocytes and chondrocytes.
